Success, Australian Workplace Skills and Professional Business Communication

Bachelor of

07/2019 ~ 06/2022

Information System, Holmesglen Institute, VIC

Key Subjects: Building Website, Business Analysis, Cloud, Managing Database, Integrating technologies with business.

Employment Experience

Freelance Full stack Developer

10/2023 ~ Present

- **Building website for business (www.hairbyhongshop.com)**

Why: The business owner asked to renovate his website because he needs a more responsive, accessible, and visually appealing website for his hair shop.

Tools: Next.js 14, TypeScript, Tailwind CSS, OAuth, MongoDB, Stripe

Outcome: This website is responsive, accessible, and fully functional, designed to attract potential clients who visit the website to book an appointment or look for information. Additionally, the website supports OAuth, allowing users to log in using their Google account to enhance security. (Around 4,000 visitors per month)

- **Search Service for Travel, Good places**

Why: When traveling or seeking recommendations for good places, we often rely on suggestions from those familiar with the area. However, organizing or remembering every place becomes challenging when we rely solely on social media platforms.

Tools: Next.js, TypeScript, Tailwind CSS, OAuth, Mongo DB, Prisma, GitHub, Google Map API

Outcome: This website offers a search function same as Google's. Users can save any place by searching for it. Once a place is saved, users can view all the places they have saved. Additionally, these saved places can be displayed on Google Maps, as the website is integrated with Google Maps. Thus, Users are expected to organize the places they want to visit more efficiently, whether they're exploring new areas or traveling to familiar destinations.

- **Headphone Online E-commerce Website**

Why: Many business owners need a responsive, attractive, and accessible website to attract more users to purchase their products.

Tools: Next.js 13, TypeScript, Tailwind CSS, OAuth, Mongo DB, Prisma, Stripe, GitHub

Outcome: This website is responsive, accessible, and fully functional, designed to attract users and enable them to purchase products without any issues. Additionally, the website supports OAuth, allowing users to log in using their Google account to enhance security, and is integrated with Stripe for payment processing.

Web Developer (Internship) in VET Resources

07/2023 – 10/2023

- **Designed admin webpage to manage clients using figma**
 - As an educational resources company, we were building a new dashboard website that clients can use to manage their students. I mainly contributed to the UX/UI design using Figma.
- **Created automated system for other employees using Microsoft Power Automate**
 - This automated system was to notify a specific department about inquiries from clients or team members as soon as they are submitted, and to provide updates on any changes. This system also displays the status of every inquiry and updates the status automatically each time it is changed. It helps each department track their work more easily and respond to inquiries from clients or other departments faster.

Supervisor in Empire Café (28 Freshwater place, Southbank)

02/2024 – Present

- Developed communication skills through delivering customer service and working as a team.
- Managing and Training team members
- Inventory management and communication with product suppliers
